

# Harvesters International Christian Center

## central Reporting System Requirements Document

---

### 1. introduction

#### 1.1 problem statement

Harvesters International Christian Center currently uses a centralized reporting template for Campus Administrators across its branches. However, due to the complexity of the template, many Campus Administrators do not consistently use it. As a result, reports are collected and submitted in different formats such as Excel, WhatsApp, and Word documents across campuses.

This lack of standardization creates reporting bottlenecks, including difficulty in consolidating reports, delays in submission, and inconsistencies in data. In addition, report review and approval are handled manually, making the process time-consuming and prone to errors.

If this situation continues, the church may experience ongoing reporting inefficiencies, reduced data reliability, and challenges in maintaining centralized records across campuses. Therefore, there is a need for a simplified, standardized, and automated reporting system to improve report collection, review, approval, and storage.

#### 1.2 Project Objective

The objective of this project is to design a standardized and user-friendly reporting system for Harvesters International Christian Center that enables structured report submission across all campuses. The system will support hierarchical reporting from ministry leaders to Campus Administrators, streamline report review and approval, and ensure centralized and consistent report storage for improved monitoring and decision-making

---

### 2.Stakeholders

The stakeholders for the Harvesters International Christian Center reporting system include all personnel involved in the collection, review, consolidation, and storage of reports across campuses and church groups. Their roles and responsibilities are summarized

| Stakeholders         | Roles /Responsibility                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------------|
| Campus Administrator | Collects reports from leaders within the campus, integrates them, and submits consolidated campus reports.        |
| Campus Pastor        | Oversees campus performance and reviews consolidated campus reports.                                              |
| Group Administrator  | Collects reports from all campuses within the group, consolidates them, reviews, and submits group-level reports. |
| Group Pastor         | Reviews all campus reports under their group.                                                                     |
| SPO                  | Reviews all group reports to ensure consistency and accuracy.                                                     |

|                 |                                                                                             |
|-----------------|---------------------------------------------------------------------------------------------|
| CEO             | Reviews all group reports for final oversight and decision-making.                          |
| SPO             | Reviews all group reports to ensure consistency and accuracy.                               |
| Church Ministry | Reviews and stores all reports for accessibility, record-keeping, and historical reference. |

---

### 3. Scope of the Reporting System

#### 3.1 In scope

- Standardizing the reporting process for all campuses of Harvesters International Christian Center
- Standardizing report collection and ensuring centralized storage of reports for accessibility and historical reference.
- Defining roles and responsibilities for report submission, review, and approval across the church hierarchy.
- Identifying the types of report required from each campus administrator
- Determining the frequency and deadline for report submission and review
- Covering reports from both functional staff and non-functional staff.

#### 3.2 Out of scope

- The project cannot be used to process financial transactions, such as offerings, tithes, or seed payments.
  - The reporting process is not intended for capturing or narrating testimonies.
  - The report process is not intended for managing general church content, such as announcement or event details.
  - The report process is not intended for streaming services or online worship.
- 

### 4. Reporting Workflow

#### 4.1 Current Process (As-Is)

##### Description:

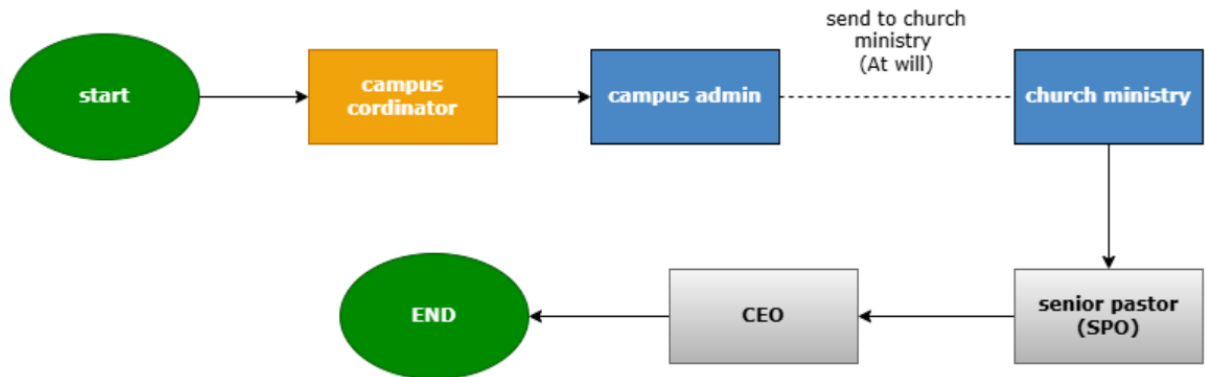

The current reporting process for Harvesters International Christian Center has multiple flows and several bottlenecks, resulting in delays and inconsistencies in report submission and consolidation.

##### Flow 1:

- Campus Coordinators submit their reports to the Campus Administrator.
- The Campus Administrator then sends the report to the Church Ministry **at their discretion**, meaning there is no enforcement to ensure timely submission.
- The Church Ministry forwards the consolidated reports to the Senior Pastor (SPO) and CEO.

- This flow creates delays and inconsistencies because Campus Administrators are **not accountable** to the Church Ministry for submitting reports.

#### AS- IS FLOWCHART. 1. DIAGRAM

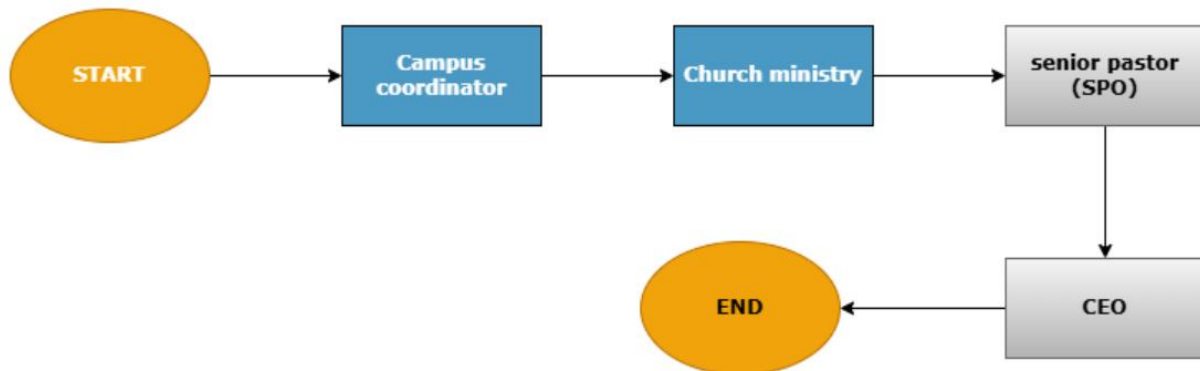

Lack of Accountability from Campus Administrator

#### Flow 2:

- Since Church Ministry staff must consolidate, review and store report and are also responsible for reporting directly to the CEO and SPO.
- To consolidate reports, Church Ministry staff must collect reports from Campus Coordinators themselves, requiring them to visit each campus or coordinate individually.
- This process is manual, time-consuming, and prone to delays, as it depends on the availability and effort of both the Church Ministry staff and Campus Coordinators

#### AS-IS FLOWCHART 2. DIAGRAM

Time Consuming Process

## Issues / Bottlenecks:

- Lack of accountability for Campus Administrators in submitting reports on time.
- Multiple manual steps increase the risk of delays and errors.
- No standardized method for submission and consolidation.
- Church Ministry staff spend significant time collecting reports rather than reviewing or analyzing them.

## 4.2 Future Process Flow (To-Be)

### Description:

This section illustrates the proposed reporting workflow designed to standardize report submission, review, and approval across all campuses. The new process introduces structured reporting stages, role-based responsibilities, status tracking, and automated notifications to ensure accountability and timely report submission.

Reports will flow through the following hierarchy:

Start → Campus Departmental Leaders → Campus Admin → Campus Pastor → Group Admin → Group Pastor → Church Ministry → Senior Pastor (SPO) → CEO → End

### Campus Admin

- Compiles reports from campus departmental leaders and submits the consolidated campus report.
- System automatically sets report status to **Submitted**.
- Campus Pastor receives an automated email notification for review.
- Can edit the report until it is approved or the submission deadline is reached.

### Campus Pastor

- Reviews submitted reports.
- Can either:
  - Approve the report (status set to **Approved**) or
  - Request edits (status set to **Requires Edits**).
- May include notes or feedback when requesting edits.
- Campus Admin receives an email notification if edits are required.
- Can view the report after approval but cannot modify status once approved or deadline is reached.

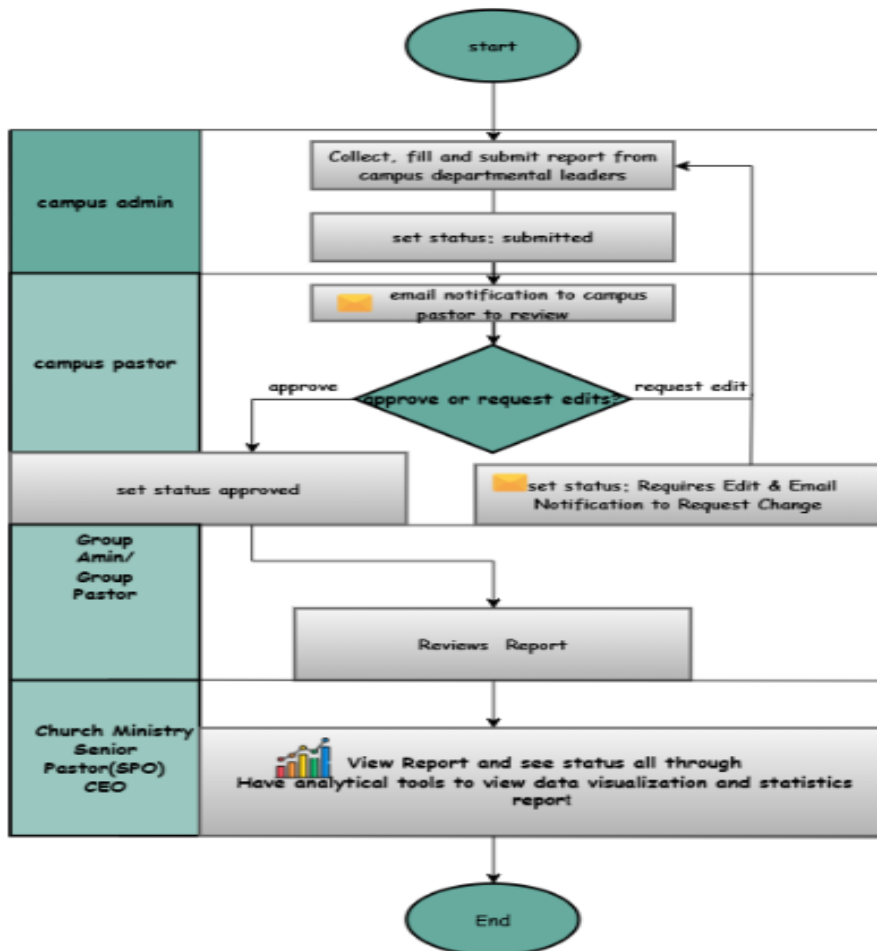

### Group Admin / Group Pastor

- Can view submitted and approved campus reports.
- Can mark reports as **Reviewed**.

### Church Ministry / Senior Pastor (SPO) / CEO

- Have visibility into reports at all stages.
- Can monitor report status across campuses.
- Have access to dashboard, analytics, and reporting statistics for decision making.

## To-Be Process flow Diagram

### Key improvements in the proposed workflow include:

- Standardized reporting process across all campuses
- Clear reporting hierarchy and approval flow
- Defined stakeholder responsibilities at each reporting stage
- Report status tracking (Submitted, Requires Edits, Approved, Reviewed)
- Email notification for report review and feedback
- Ability to edit reports before approval deadline
- Centralized report visibility for leadership

- Improved monitoring and accountability in report submission

---

## **5. Functional requirement**

This section outlines the functional requirements for the Central Reporting System. These requirements describe the specific system capabilities and behaviors needed to support campus report submission, review, approval, and monitoring processes.

### **5.1 Dashboard Structure**

FR1: The system shall provide a dashboard that organizes campuses by **groups**.

### **5.2 Group Navigation**

FR2: The system shall display all campus groups on the dashboard

FR3: The system shall allow users to click on a group to view campuses under that group.

FR4: The system shall display campuses in a dropdown list when a group is selected.

### **5.3 Role-Based Reporting Fields**

FR5: The system shall display reporting fields based on the user's role.

FR6: The system shall allow stakeholders to enter data into their assigned departmental reporting fields

FR7: The system shall restrict users from viewing or editing fields not assigned to their role.

### **5.4 Strategic Indicator & Key Metric Structure**

FR8: The system shall allow each Strategic Indicator to contain related Key Metric fields.

FR9: The system shall require users to enter values for each Key Metric as numeric input fields.

FR10: The system shall capture the following data fields for every Key Metric:

- Monthly Goal
- Monthly Achieved
- Year-on-Year Goal

FR11: The system shall validate that all metric fields accept numeric values only.

FR12: The system shall make required Key Metric fields mandatory before submission.

FR13: The system shall restrict Key Metric fields to numeric input only.

FR14: The system shall automatically validate that entered values are within acceptable ranges.

FR15: The system shall automatically save entered Key Metric values.

FR16: The system shall automatically calculate performance summaries for Strategic Indicators.

FR17: The system shall prevent submission if required Key Metric fields are empty.

### 5.5 Field Locking & Time-Based Controls

FR18: The system shall automatically lock the **Monthly Goal** field once it has been submitted for the reporting month.

FR19: The system shall automatically lock the **Year-on-Year Goal** field once it has been submitted.

FR20: The system shall allow editing of the **Monthly Achieved** field until the end of the reporting month.

FR21: The system shall automatically lock the **Monthly Achieved** field at the end of the reporting month.

FR22: The system shall prevent modification of locked fields.

FR23: The system shall allow only authorized administrative roles to override locked fields, if required.

### 5.5 Role Access and Permissions

FR19: The system shall grant Church Ministry, SPO, and CEO roles full view access to all reports across all groups, campuses, and reporting levels

FR24: The system shall allow Group Admin and Group Pastor to view campus reports and mark them as **Reviewed**.

FR25: The system shall allow all stakeholders to view report activities based on their access level.

FR26: The system shall grant SPO, Church Ministry, and CEO access to analytical dashboards and strategic reports across all reporting levels.

### 5.6 Editing Control

FR27: The system shall allow report editing within a defined reporting timeframe.

FR28: The system shall prevent report editing once:

- The report has been approved, or
- The reporting deadline has passed.

FRD 29: The system shall automatically approve reports when the reporting deadline is reached without approval action.

## **5.7 Notification Requirements**

FR30: The system shall send email or system notifications to stakeholders when:

- A report is submitted
- Edits are requested
- A report is approved
- A report is available for review

## **5.8 Reporting Schedule Requirement**

FR 44: The system shall support weekly report submission for Strategic Indicators and Key Metrics.

FR 45: The system shall allow authorized users to submit reports within the defined weekly reporting period.

FR 46: The system shall track reports by week, month, and year

## **5.9 User Authentication**

### **Referral Registration**

FR 47: The Super-admin account shall be created by the developer with default credentials.

FR 48: The Super-admin shall generate registration links for top-level roles (CEO, SPO, Church Ministry Head) and share them with the respective users.

FR 49: Users visiting a referral link shall be directed to a registration page to enter their details (email, password, username, phone number, etc.).

FR 50: The system shall automatically assign the user's role and group/campus (if applicable) based on the referral link.

FR 51: Group admins shall be able to generate registration links for roles below them (Campus Pastor, Campus ad)

### **Classic Registration (Fallback)**

FR 52: Users shall be able to register by entering email, password, display name, and phone number.

FR 53: Users registering via classic registration shall be assigned the default role of "Member."

FR 54: Super-admin shall be able to reassign roles after successful registration if necessary.

### **Login / Authentication**

FR 55: Users shall be able to log in using email and password.

FR 56: Upon login, users shall only have access to dashboards, tools, and features according to their assigned roles (role-based access control).

FR 57: Registration referral links shall remain valid until used for successful registration.

FR 58: A referral link shall become invalid after it has been used once.

---

## 6. Non-Functional Requirements

### 6.1 Performance

NFR-01: The system shall load the dashboard within **3 seconds** under normal network conditions.

NFR-02: The system shall process report submissions within **5 seconds**.

NFR-03: The system shall support concurrent users across multiple campuses without performance degradation.

### 6.2 Availability

NFR-04: The system shall be available **24/7**, except during scheduled maintenance.

NFR-05: Scheduled maintenance shall be communicated to users in advance.

### 6.3 Security

This is very important for church reporting data.

NFR-06: The system shall implement **role-based access control (RBAC)**.

NFR-07: The system shall require secure login authentication.

NFR-08: The system shall encrypt sensitive data in transit.

NFR-09: The system shall maintain an audit trail of report submissions, edits, and approvals.

### 6.4 Usability

NFR-10: The system interface shall be user-friendly and intuitive.

NFR-11: Users shall be able to navigate between groups and campuses in no more than three clicks.

NFR-12: The system shall provide clear validation messages for incorrect or missing inputs.

### 6.5 Compatibility

NFR-13: The system shall be accessible on:

- Desktop/laptop browsers
- Tablets
- Mobile devices

NFR-14: The system shall support modern web browsers (Chrome, Edge, Safari, Firefox).

## **6.6 Data Storage & Retrieval**

NFR-19: The system shall maintain a centralized database for storing reporting data across campuses and groups.

NFR-20: The system shall allow authorized users to retrieve historical reporting data when needed.

NFR-21: The system shall ensure stored report data remains consistent and accessible.

## **6.7 Data Integrity & Backup**

NFR-15: The system shall automatically save report data to prevent loss.

NFR-16: The system shall perform daily data backups.

NFR-17: The system shall ensure data consistency across reporting levels.

## **6.8 Scalability**

NFR-18: The system shall support addition of new groups, campuses, and strategic indicators without system redesign.

## **6.9 User Authentication**

NFR-18: Passwords shall be stored securely (e.g., encrypted in the database).

NFR-19: Login sessions shall expire after a specified period of inactivity (e.g., 30 minutes).

NFR-20: Login credentials shall be transmitted securely over HTTPS.

NFR-21: The system shall be able to support simultaneous logins for at least 200 users without performance degradation.

NFR-22: The system shall maintain an audit trail for all login and registration activities.

---

## **7. Assumptions**

- All campuses have internet access
  - Users will have login credentials
  - Strategic indicators will be provided by campus leaders to campus admins
  - All stakeholders have access to an internet-enabled device (laptop, tablet, or mobile phone) to use the reporting system.
- 

## **8. Constraints**

### **8.1 Web Access Only**

- The platform will be accessed through a web browser
- No mobile app will be used for now

### **8.2 Existing Church IT Setup**

- Only the church's current computers, internet, and network will be used
- No new servers or special devices will be purchased

### **8.3 Budget Limitations**

- Some features may be limited or added later depending on available funds

### **8.4 Reporting schedule**

- Branches must submit reports on a weekly cycle.
  - The schedule must be followed for consistency
- 

## **9. Risks**

- User may resist adopting new system
- Delayed report submission
- Data entry errors
- System downtime during peak reporting periods.

---

## 10. Approval

| Name                | Role | Signature | Date |
|---------------------|------|-----------|------|
| Church ministry     |      |           |      |
| Senior pastor (SPO) |      |           |      |
| CEO                 |      |           |      |
